4. FIRST AID MEASURES

General notes: IF exposed or concerned: Get medical advice/attention.

After inhalation: If inhaled, remove to fresh air. If not breathing, give artificial respiration or give oxygen by trained personnel. Seek immediate medical attention.

After skin contact: IF ON SKIN: Wash with plenty of soap and water. If skin irritation or rash occurs: Get medical advice/attention. Wash contaminated clothing before reuse.

After eye contact: IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice/attention.

After ingestion: Do NOT induce vomiting. IF SWALLOWED: Call a POISON CENTER or doctor/physician if you feel unwell.

Self-protection of the first aider: No information available.

NOTES TO PHYSICIAN: The decision whether to induce vomiting or not should be made by an attending physician. If lavage is performed, suggest endotracheal and/or esophageal control. No specific antidote. If burn is present, treat as any thermal burn. Specific treatment must be based on judgement of the physician in response to reactions of the patient.

5. FIRE FIGHTING MEASURES

Extinguishing Media: Use water spray to cool fire exposed containers. Use carbon dioxide, dry chemical or water spray to extinguish fires.

Fire and Explosion Hazards: Can burn in fire, releasing toxic vapors. No known unusual hazards in a fire/explosion situation.

Fire Fighting Instructions: Wear self-contained breathing apparatus and protective suit. Cool containers with flooding quantities of water until well after fire is out. Do not allow run-off from firefighting to enter drains or water courses.

6. ACCIDENTAL RELEASE MEASURES

Avoid breathing vapors or mists. Remove all sources of ignition. Use personal protective equipment as required. Avoid contact with skin, eyes or clothing. Keep people away from and from upwind of spill/leak.

Do not allow into any sewer, on the ground or into any body of water. If the product contaminates lakes, rivers or sewage, inform appropriate authorities in accordance with local regulations. Prevent further leakage or spillage if safe to do so. Local authorities should be advised if significant spillages cannot be contained.

METHODS FOR CONTAINMENT: Prevent further leakage or spillage if safe to do so.

METHODS FOR CLEANING UP : Dispose of waste product or used containers according to local regulations. Clean with detergents. Avoid solvent cleaners. Dam up. Soak up with inert absorbent material (e.g. sand, silica gel, acid binder, universal binder, sawdust). Pick up and transfer to properly labeled containers. Clean contaminated surface thoroughly. Take up mechanically, placing in appropriate containers for disposal.

7. HANDLING AND STORAGE

Handling: Empty drums should be completely drained, properly bunged and promptly returned to a drum reconditioner or properly disposed of. When sampling containers, use appropriate PPE.

Physically Handling: Avoid extreme temperatures.

Storage Precautions: Keep container closed when not in use. Protect containers from physical damage. Control inventory by using oldest material first. Suggest stainless steel construction for bulk storage, but mild steel is acceptable.

Miscellaneous: Maintain good housekeeping.

8. EXPOSURE CONTROLS - PERSONAL PROTECTION

Engineering Controls: Good general ventilation should be enough to control airborne levels.

Eye/Face Protection: This material does not have established exposure limits. Wear safety glasses.

Skin Protection Requirements: For brief contact, normal work attire should be enough. When material is heated, wear gloves to protect against thermal burns.

Respiratory Protection Requirements: Under normal use conditions, with adequate ventilation, no special handling equipment is required.

Miscellaneous: Maintain good personal hygiene. Local exhaust ventilation is recommended when generating excessive levels of vapors from the handling or thermal processing.

Exposure Guidelines: No information available.
